Dept. of Computer Science and Engineering, University of Moratuwa, Sri Lanka.

OBJECTIVE

Computer Science and Engineering graduate awaiting formal graduation, seeking an opportunity to apply and further develop my technical skills. Passionate about solving technical problems and building reliable and scalable solutions, with a strong ability to quickly learn and adapt to new technologies, tools, and engineering practices.

EXPERIENCE

- Senzmate**  Dec 2024 - May 2025
Intern Software Engineer Colombo 04, Sri Lanka
 - Contributed to the development of SenzMate and SenzAgro websites using React and Next.js, focusing on performance, SEO, and responsive UI/UX design.
 - Contributed to the development of SenzMate website admin portal (CMS) using React and Redux, implementing features for content management.
- Department of Computer Science and Engineering, University of Moratuwa** Jan 2026 - Present
Teaching Assistant

EDUCATION

- University of Moratuwa** 2021 - Present
Bsc. Computer Science and Engineering Katubedda, Sri Lanka
 - GPA: 3.41/4.00
- H/Vijayaba National School** 2016 - 2020
GCE Advanced Level Hungama, Sri Lanka
 - Z-score: 2.4724
 - Island Rank: 186
 - Physics: A, Chemistry: A, Com. Maths: A, General English: A
- H/Vijayaba National School** 2010 - 2015
GCE Ordinary Level Hungama, Sri Lanka
 - 7A, 2B

PROJECTS

- Segment Based Train Seat Booking System** Aug 2026 
Tools: FastAPI | React | PostgreSQL | Docker | Nginx | AWS EC2 | AWS RDS | AWS ALB
 - Developed a full stack train seat booking system with segment based seat allocation, automated trip scheduling and status updates, booking and cancellation validation and a responsive UI for real time seat availability and ticket management.
 - Built a RESTful FastAPI backend with PostgreSQL, SQLAlchemy, Alembic migrations and APScheduler for automated railway operations.
 - Containerized the frontend and backend using Docker and deployed them on separate AWS EC2 instances, with PostgreSQL hosted on Amazon RDS and an Application Load Balancer routing traffic to the frontend.
- NexLib** Jul 2024 - Oct 2024 
Tools: React | NodeJS | ExpressJS | MySQL | TailwindCSS
 - A Library Management System which enables users to manage books, track borrow or return records, handle user registrations, and maintain real-time availability status.
 - Contributed to the project by developing a responsive and intuitive frontend and implementing a robust backend with database design to ensure secure, efficient, and scalable data management.
- Green Cart** Jul 2025 
Tools: React | NodeJS | Express | MongoDB
 - Developed and deployed a full-stack grocery delivery web application using the MERN stack, integrating Stripe payment gateway for secure online transactions and deployed on Vercel.
 - Built an admin dashboard with product management capabilities, enabling real time inventory control, order tracking, and comprehensive CRUD operations for the grocery delivery platform.
- SmartSense Music** Dec 2025 
Tools: React Native | Expo | NodeJS | PostgreSQL

- Developed a React Native app that adapts music playback in real time using sensor data, with a simple interface showing context and the current track.
- Built a Node.js and PostgreSQL backend for context extraction, playlist management and user preferences.
- **My MCP Server** Sep 2025
Tools: TypeScript | MCP SDK | Cloudflare [G]
 - Built a custom MCP server exposing two tools, for answering my CV related queries and sending emails to my gmail address via the Resend API.
 - Deployed the MCP server on Cloudflare Workers, integrates seamlessly with MCP compatible clients such as Claude Desktop.
- **URL Shortener Application Deployment on AWS** Jul 2026
Tools: AWS EC2 | Amazon RDS | Amazon Linux | NGINX | Git | GitHub [G]
 - Deployed a URL shortener application using AWS EC2, RDS (PostgreSQL) and NGINX.
 - Implemented Node.js REST APIs for URL generation and redirection.
- **Heart Disease Prediction and Diagnostic Classification Model** Jul 2026
Tools: Python | Scikit-learn | Pandas | NumPy | Matplotlib | Seaborn [k]
 - Engineered an end to end classification pipeline on the UCI Heart Disease dataset using Scikit-learn and Pandas, incorporating polynomial feature expansion, PCA, and cross validation to optimize model generalization.
 - Trained and tuned multiple classical ML models, including Logistic Regression, Support Vector Machines, and Random Forests using GridSearchCV to maximize diagnostic classification accuracy.

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Java
- **Databases:** PostgreSQL, MySQL, MongoDB
- **DevOps:** Linux, AWS, Docker, Git, GitHub, Bitbucket
- **Web Development:** React, NextJS, NodeJS, ExpressJS, Springboot, FastAPI, TailwindCSS
- **Data Science & Machine Learning:** Tensorflow, Numpy, Pandas, Matplotlib, Seaborn
- **Other Tools:** Jira, Vercel, Cloudflare Workers, Supabase, Wordpress

HONORS AND AWARDS

- **Dean's List** - Semester 01 2022
- **Dean's List** - Semester 08 2026

VOLUNTEER AND LEADERSHIP EXPERIENCE

- **Director of Finance and Marketing** - Classical Music Society Dec 2024 - Dec 2025
- **Logistics Committee Member** - CSE Careers Fair 2023 Jan 2024
- **Organizing Committee Member** - EXMO 2023 Jul 2023
- **Teaching Volunteer** - Shilpasara Project, Leo Club Aug 2022

CERTIFICATIONS

- **HTML, CSS and JavaScript for Web Developers - Johns Hopkins University**
- **Intro to Machine Learning - Kaggle**
- **Pandas - Kaggle**
- **Feature Engineering - Kaggle**
- **Data Cleaning - Kaggle**

ADDITIONAL INFORMATION

Languages: Sinhala (Native), English (Fluent)

Interests: Art, Music, Cricket, Badminton
